SUMMARY

Software Engineer with strong foundations in **C++, DSA, and OOP**. Experienced in building **full-stack and AI-powered applications** using React.js, Node.js, Express.js, MongoDB, and RESTful APIs. Skilled in developing scalable features and integrating third-party APIs with a focus on clean, reliable, and maintainable code.

EDUCATION

Bachelor of Technology in CSE (AI)

NIET Greater Noida | CGPA: **8.29/10**

Greater Noida, UP

2023 – 2027

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, SQL

Frontend: React.js, HTML, Tailwind CSS

Backend: Node.js, Express.js, RESTful APIs, WebRTC, Socket.io

Databases: MongoDB, PostgreSQL

AI & Tools: Gemini API, FFmpeg, Git, Github

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems

PROJECTS

AI Short Video Ads Generator (MERN, Gemini API, Clerk)

[GitHub](#) | [Live](#)

- Built an **AI-powered platform** that generates short video advertisements using product and model images with customizable prompts and aspect ratios.
- Implemented **Clerk authentication**, subscription plans, project management, and a community showcase for managing and sharing generated videos.
- Developed **React and Node.js/Express** workflows with Google GenAI, file uploads, REST APIs, and request validation for AI video generation.

AI Mock Interview Platform (MERN, Gemini API, WebRTC, MediaPipe)

[GitHub](#) | [Live](#)

- Built an **AI-powered mock interview platform** that analyzes resumes and generates personalized interview questions based on candidate profiles.
- Implemented **WebRTC-based video interviews** with voice interaction, video recording, and **MediaPipe** for facial and posture analysis.
- Added a **Monaco-based coding environment**, AI answer evaluation, follow-up questions, performance analytics, and interview replay.

Payment Processing System (MERN, Node.js, Express, MongoDB)

[GitHub](#) | [Live](#)

- Built a full-stack **payment gateway system** with order and payment lifecycle management for simulated Card, UPI, Net Banking, and Wallet transactions.
- Implemented **idempotent payment processing**, retry mechanisms, transaction logging, and asynchronous **webhook simulation** for reliable payment state handling.
- Secured APIs with **JWT authentication**, **role-based authorization**, **rate limiting**, **request validation**, and masked card data without storing CVV.

ACHIEVEMENTS

- LeetCode:** **Knight Badge** holder; solved **700+** problems with a peak rating of **1900+** (**Top 5%** globally).
- CodeChef:** **3-Star** Coder (Max rating **1600+**); consistently ranked among the top 100 in divisional coding contests.
- Codeforces:** Achieved **1200+** rating, demonstrating advanced algorithmic problem-solving under time constraints.

CERTIFICATIONS

- Data Structures & Algorithms using C++** – Coding Blocks (Completed comprehensive program in advanced DSA and C++ concepts)
- Advanced Frontend (React JS), Node JS & Web Development** – Incapp (Completed offline classroom training in full-stack engineering)
